Regarding the NEL (micro) data, the word file posted on the FTP site does not appear to contain any sample data only a case narrative discussion of the data quality. Am I missing something in the file or has the data not yet been posted?

Thank you,

Note: The EDD for data from Test America is in the SEDD_2a format. Unfortunately OASQA does not currently have a tool to edit .xml files. Based on validation results, the "J" qualifier for all results will need to be changed to "R" for this case. This change has already been performed in the hardcopy and electronic data validation report.
